CIT RANGE

Protective cabinets for small and medium format thermal printers

General characteristics:

• The body of the cabinet is a single, thermoplastic form, meaning the upper and side panels are a single unit;

• The panels are made of a through-stained,10 mm thick composite material, protecting the cabinet and making it watertight;

• Smooth outer surface, without angles to facilitate cleaning and avoid the accumulation of waste.

SPECIFIC FEATURES OF CIT STANDARD :

• Two hinges enable the top panel of the cabinet to tilt forward to access the printer mechanics and enable label insertion;

• Connectivity: two standard 7 to 13 mm cable glands (on the base) to allow cables to enter the cabinet;

• Printer elevation skids to pull it forwards out of the cabinet.

SPECIFIC FEATURES OF CIT STANDARD & CIT C - Front panel:

• Printer controls and labels accessed via the front panel using a 6 mm-thick raisable flap made of PMMA (transparent thermoplastic);

• The raisable flap is closed tightly against the leaktight seals with a latch.

SPECIFIC FEATURES OF CIT L & CIT L GM:

• Sliding shelf fitted to triple extending rails in stainless steel, capable of handling loads of up to 60 kg, allowing the printer to be removed fully;

• Connectivity: two standard cable glands (7 to 13 mm) to allow cables to enter the cabinet.
Front panel:

• Printer controls and labels accessed via the front panel using a 6 mm-thick raisable flap made of PMMA (transparent thermoplastic);

• The raisable flap is closed tightly against the leaktight seals with a latch.

Specificities of CIT L GM : *Rails in stainless steel triple development of 550 mm*

Advantages:

• Ergonomically designed cabinet
• Guaranteed leak-tight seal
• Protection suited to small and medium format thermal printers

Fixed and mobile workstations

*The food grade protection solution
for your small and medium
format laser printers*

ELEVATION SKIDS option

ELEVATION SKIDS option

- Two composite material elevation skids fixed to the base to raise the cabinet;
- Facilitates cleaning under the cabinet and avoids stagnant water.

KDL option

- Opening cable gland system designed to allow cables to be connected without having to remove their end pieces;
- The gable glands are in two sections which hold the cables in leaktight seals;
- Generally fitted to the right hand side panel, assuring a leaktight to assure the cabinet remains leaktight.

Option LIGHT + GUIDE

Option INSPECTION PORT

Option TAV L 12

LABEL SLOT options

- LIGHT + GUIDE: Cut-out from the PMMA front panel with a guide to facilitate label handling;

- LIGHT: Cut-out from the PMMA front panel;

- TAV: Inspection port in unbreakable polycarbonate
Available in two sizes:
  - *TAV L 12: W 220 x H 100 mm - watertight;*
  - *TAV L 24: W 220 x H 190 mm.*

Additional options:

- For the CIT L GM: Possibility of using 550 mm length slides
- Legs made of brushed stainless steel (304);
