# Designer Manufacturer

#### Protective enclosure for large format thermal printers

Characteristics:

• The enclosure body consists of a single thermoplastic unit so that the front, side and rear are part of the same structure;

10 mm thick composite walls, dyed in the mass, to protect and seal the enclosure (RAL 7037);

Connections: 80 mm diameter cable port;

- VENTILATION: The ventilation and suction systems are used to:
  - Suck, filter and pressurise the inner volume;
  - Discharge air when opening the enclosure, which creates a barrier preventing dust from entering.

#### Left side:

Inlet grille equipped with filter to trap the dust.

Rear panel:

- An ECA (fan placed behind a grille with filter);
- The computer hardware is powered up when the enclosure (fan) is switched on via a switch.

Right side: Handling:

- Side access to thermal printer;
- Enclosure opening & closing:
- Side panel folds down, fitted on piano hinge and closed with two latches;
- Thermoformed cover with PVC strengthener to improve the strength of the panel:
  - Cover closes against drop-down flap fitted with lip seals;
  - Fitted with hinges and opening assisted by two gas springs.

#### Front panel:

 Printer controls and labels accessed via the front panel using a 6 mm thick PMMA (transparent thermoplastic) fold-down flap;

### Advantages: •

- Shock resistant
- Optimum physical and thermal protection
- Suitable for thermal printerslarge format thermal printers

Soundproofed version available: SOUNDPROOFING TGC

### TGC DIMENSIONS (mm):

Overall outer dimensions

Useful inner dimensions

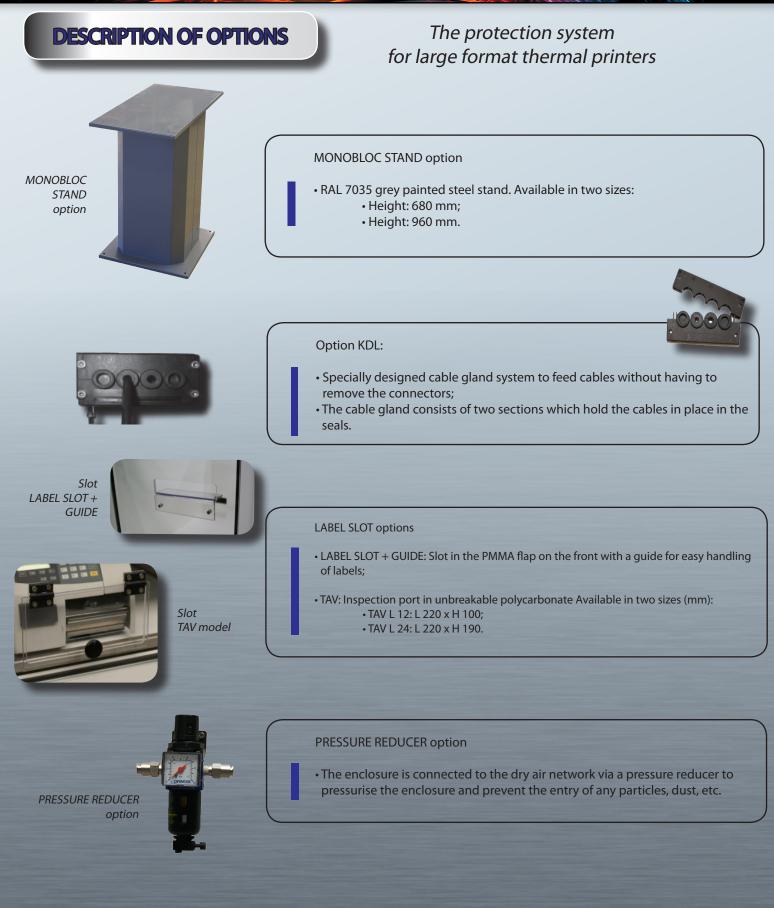

W 450 x D 750 x H 500 mm W 430 x D 730 x H 480 mm

Inner view of the TGC: Ventilation grilles on the side and ECA with switch on the rear

TGC with Option PIETEMENT MONOBLOC

## Fixed and mobile workstations
